

RYAN GREEN

2205 Lower Mall, Vancouver, BC

250-734-1274 | greenryan761@gmail.com | [linkedin.com/ryanjgreen](https://www.linkedin.com/ryanjgreen)

Education

University of British Columbia

Sept 2023 – Apr 2026

Bachelor of Science in Mathematics, Minor in Economics

Vancouver, BC

- **Macro & Finance:** Computational Methods in Macroeconomics, Behavioural Economics, Money & Banking, International Finance, Econometrics II.
- **Quantitative Methods:** Machine Learning & Data Mining, Stochastic Processes, Variational Methods, Probability, Applied Linear Algebra.

University of Victoria

Sept 2022 – Apr 2023

Bachelor of Engineering

Victoria, BC

- Coursework: Software Construction, Calculus I-III, Physics, Engineering Design.

Trading Experience

Independent Equity Trader

Jan 2023 – Present

Discretionary Long/Short

Vancouver, BC

- Trade discretionary long/short equity across momentum, mean-reversion, and event-driven strategies, adapting position sizing and holding periods to prevailing market regime.
- Source trade ideas from institutional flow, sell-side research, and earnings calls, focusing on setups with strong fundamental and technical confluence.
- Manage portfolio exposure using market breadth indicators (% stocks above 50-day MA, advance-decline ratio) to identify regime changes and adjust risk accordingly.

Markowitz Portfolio Optimization

Mar 2025

Computational Optimization

Vancouver, BC

- Built a portfolio optimization tool to construct minimum-risk portfolios, backtesting performance against historical market stress events to analyze correlation breakdowns.
- Applied projected gradient descent and convex projections to model realistic trading constraints, simulating liquidity limits and sector exposure caps.
- Analyzed return-risk tradeoffs using real-time equity data to visualize the efficient frontier, gaining practical intuition for asset allocation and diversification strategies.

Professional Experience

Automutatio

May 2024 – Sept 2024

Software Engineering Intern

Vancouver, BC

- Engineered a custom risk-analysis dashboard used to stress-test client project exposure, reducing data query latency by 40% to enable faster decision-making.
- Architected Azure infrastructure with Terraform, deploying Key Vault and SQL DBs to optimize project security and scalability for enterprise clients.
- Leveraged advanced algorithms and Microsoft Graph API to enhance backend performance, streamlining complex data querying processes.

Herold Engineering

May 2023 – Sept 2023

Engineering Intern

Nanaimo, BC

- Developed automated Python scripts to scrape and aggregate real-time project data, creating a centralized 'tape' of operational metrics that optimized resource allocation.
- Built a seismic force calculator using Python and React, enabling engineers to efficiently compute building-specific risk calculations.
- Collaborated with engineers to solve complex structural design problems, applying mathematical analysis to optimize project outcomes.

Skills

Trading Platforms: Bloomberg Terminal, Capital IQ, IBD MarketSurge

Programming: Python, SQL, R, C++, VBA, MATLAB

Other: Excel/VBA, Power Query, Terraform, Azure

Interests: Golf, Tennis, Fly Fishing, Skiing
